

Perfect slicing of salmon

High quality blades for salmon processing machines

High quality – favourable prices

The range of salmon blades comprises high-performance standard knives in superior stainless steel quality. All blades are characterised by uniform, high quality, and your benefits include great process reliability, high cutting performance and very favourable prices.

Day-to-day shipment

We make daily shipments from the central stock in Denmark. We have distributors and agents in many countries ready to support you and supply from nearby stocks. KYOCERA UNIMERCO's RE-NEW™ service will extend knife lifetime – with performance guarantee.

Here today – gone tomorrow?

Not KYOCERA UNIMERCO. We have more than 25 years of experience distributing machine knives for fish processing machines. That is your guarantee for competent and competitive service – today and tomorrow.

Our products comply with EU Regulation EC 1935/2004 (materials and articles intended to come into contact with food) and EC 2023/2006 (good manufacturing practice for materials and articles intended to come into contact with food).

Our management system is certified according to ISO 9001:2008 (quality) and ISO 14001:2004 (environment).

KYOCERA UNIMERCO Tooling A/S

KYOCERA UNIMERCO manufactures, distributes and services tools for machining, as well as measuring equipment for the manufacturing industry. The tooling concept comprises standard and customised tools, RE-NEW® tool maintenance, coating and optimisation guidance. The Danish company was established in 1964 and has product development, production, sales and service in the corporate headquarters, located in Sunds.

The company is part of the KYOCERA UNIMERCO group, founded in Denmark in 1964 and originally named UNIMERCO. In 2011, all activities were acquired by Japan-based KYOCERA. This has created an even stronger company with a larger range of products, a wide network of companies and distributors all over the world, and an ambitious growth plan.
