VIKING PS4185

Search and rescue immersion suit with integrated buoyancy aid

- Next generation comfort and design

VIKING LIFE-SAVING EQUIPMENT AS

WHEN IT COMES TO
safety
THINK VIKING.

VIKING PS4180 - Anti-exposure suit without buoyancy aid

The suit is also available without integrated buoyancy. While it still offers all the features and benefits of PS4185, it must be worn with a lifejacket.

Sizes and colours

S, M, L, XL, 2XL and 3XL

Yellow fabric with grey reinforcements and pockets

Yellow fabric with blue reinforcements and pockets

Orange fabric with grey reinforcements and pockets

The new SOLAS approved VIKING PS4185 combines uncompromising quality with a unique tailored design for one of the most outstanding protective suits available today.

Complete with an integrated buoyancy aid this suit is worn without a lifejacket – giving the wearer ultimate freedom of movement. A watertight U-shaped zipper can comfortably be kept closed during frequent wear for added safety.

Utilising only the best materials available VIKING incorporates a waterproof, highly durable and breathable GORE-TEX® Pazifik™ outer fabric with a GORE-TEX® moisture barrier to reduce heat stress and help protect the wearer in extreme situations. Combined with a durable thermal lining this suit will perform under even the toughest maritime conditions while still offering comfortable wear during constant use.

A choice of detachable liners with integrated buoyancy foam makes this an ideal suit for search and rescue teams, offshore personnel, ship & MES crews, water police, coast guards and lifeguards operating in both cold and warmer climates.

VIKING features

Integrated buoyancy aid

The PS4185 comes with an integrated 100N manually inflated buoyancy chamber.

Buddy line & lifting becket

Designed for situations when close contact to other persons is critical. Buddy line is stored in slim fit shoulder pocket when not in use.

Equipment pockets

Multiple pockets for optimal comfort: GPS, glow stick and PLB pockets as well as radio, knife (knife is optional) and light pockets. Two fleece hand warmer pockets with drain holes and water repellent flaps on hips.

Wrist seals

The flexible watertight neoprene double cuffs are fitted with Velcro-like adjustment straps for optimal comfort and extended wear.

Zipper

High strength and flexible metal zipper ensures the suit is watertight. U-shaped for quick and easy donning. Convenience zip. Wax included.

Retro-reflective tape

Retro-reflective tape on hood, shoulders and sleeves reflects light back at source for higher visibility and aided day and night rescue.

Light and whistle

Fully equipped with SOLAS approved light and whistle.

Extra reinforcements

Silicone Kevlar® reinforced knees and Cordura® reinforced seat area for extra durability.

Intake at waist

PS4185 has a belt intake over the buoyancy aid to ensure a correct flotation angle.

Hood

Fixed hood (black) in flexible neoprene.

Choice of options

Footwear

Choice of attached rubber safety boots with steel caps and steel soles; attached rubber boots, or GORE-TEX® socks.

Gloves

Choice of 3 or 5 finger detachable gloves with shark skin palms for a secure grip. Gloves are attached to the wrist by a strap and are easily stored in slim fit sleeve pockets.

Extra features

- select as needed:

Zipper fastened thermal inner lining

A choice of thin or thick detachable thermal liners (with integrated 70N buoyancy foam) makes the suit ideal for operations in both cold and warmer climates. Liner is kept in position with zippers that ensure it stays in a fixed position. Can easily be removed for cleaning and replacement.

Detachable pockets

Choice of detachable ID pockets and/or transparent map pockets. Pockets are safely and easily attached to box pockets on sleeves with a Velcro-like closure.

Print on back

Have your name or company logo incorporated into the suit with custom heat sealed print/lettering on back

Sizes and colours

S, M, XL, 2XL, and 3XL (short, ordinary and long)

Yellow fabric with grey reinforcements and pockets

Orange fabric with grey reinforcements and pockets

What makes PS4185 a unique solution?

- Complete with an integrated buoyancy aid this suit is worn without a lifejacket - giving the wearer ultimate freedom of movement. A watertight U-shaped zipper can comfortably be kept closed during frequent wear for added safety.
- The waterproof GORE-TEX® material offers high breathability and better comfort. Designed to reduce some of the factors that cause heat stress.
- Combined with a durable thermal liner the PS4185 will perform under even extreme maritime conditions while still offering comfortable wear during constant use.
- Tailored for extended wear and maximum comfort with many design extras that makes it truly outstanding. Several options can create a unique solution with a custom look.
- Manufactured to withstand the harshest conditions. A high quality finish with several reinforcements, including knee, thighs and seat area, ensure a rugged and durable suit for constant wear.

Discover the VIKING advantage

VIKING is a market leader in maritime safety, providing and servicing essential safety equipment for passenger and cargo ships, offshore installations and vessels, the defence sector, industrial fire fighting as well as leisure yachts.
