

O.₁ STANDBY POWER

Take responsibility for the future

LINAK® 
WE IMPROVE YOUR LIFE

Take responsibility for the future

The climate awareness of people is growing, both in the personal and the professional spheres.

– One of the hot topics in the climate discussion is the focus on lowering the CO₂ emission by limiting the standby power consumption. The DESKLINE® ZERO™ series of control boxes will do just that.

LINAK is a leader within development and manufacturing of linear actuator systems. Our dedicated focus on innovation and partnership inspires us continuously to develop new and update current products to meet the demands in the market. LINAK has launched updated versions of all the DESKLINE® control boxes. The ZERO™ control boxes have a low standby power consumption of maximum 0.1W – with these control boxes LINAK sets new standards for electrical height adjustable desks.

DID YOU KNOW...

What is standby power?

Standby power consumption is the power used by electrical equipment while the equipment is switched off or not performing its primary function e.g. a TV is on standby power when the TV is turned off, but still connected to the mains.

Why do we need standby power?

Some electrical equipment have a “standby mode”, where it will continue to operate in a reduced capacity while it has been turned off. The only function of the standby mode is that the equipment can be switched on again by the use of a remote.

Standby power consumption in the world

Typical 5-10% of residential electricity used in most developed countries are related to standby power. This standby consumption is roughly responsible for 1% of the global CO₂ emissions. *1

CHOOSE LINAK FOR...

- A world leading manufacturer of actuator systems
- An in-house core competency in electronic design within advanced software development
- A true system supplier with 25 years of experience and in-depth know-how in both mechanical and electronic development
- A well developed global sales and service organisation presently in more than 35 countries around the world
- A close collaborative effort with our customers to develop innovative solutions

Terms of use

The user is responsible for determining the suitability of LINAK products for specific applications.

LINAK takes great care in providing accurate and up-to-date information on its products.

However, due to continuous development in order to improve its products, LINAK products are subject to frequent modifications and changes without prior notice. Therefore, LINAK cannot guarantee the correct and actual status of said information on its products.

While LINAK uses its best efforts to fulfil orders, LINAK cannot, for the same reasons as mentioned above, guarantee the availability of any particular product. Therefore, LINAK reserves the right to discontinue the sale of any product displayed on its website or listed in its catalogues or other written material drawn up by LINAK.

All sales are subject to the Standard Terms of Sale and Delivery for LINAK. For a copy hereof, please contact LINAK.
